About

About

Quality Workmanship

Hardware is a beautifully complex world. A lot of hard work and skill go into creating a simple door knob or handle. The basic elements of a door handle include:

Rosette: The plate that is fashioned for attachment to the surface of a door

Lever/Knob: The part that is grasped by the hand.

About

When producing door hardware, many concepts must be considered.

Aside for appearance, parts of each element must be carefully contemplated.

- Shape
- Size
- Tactile features

Typical design features include:

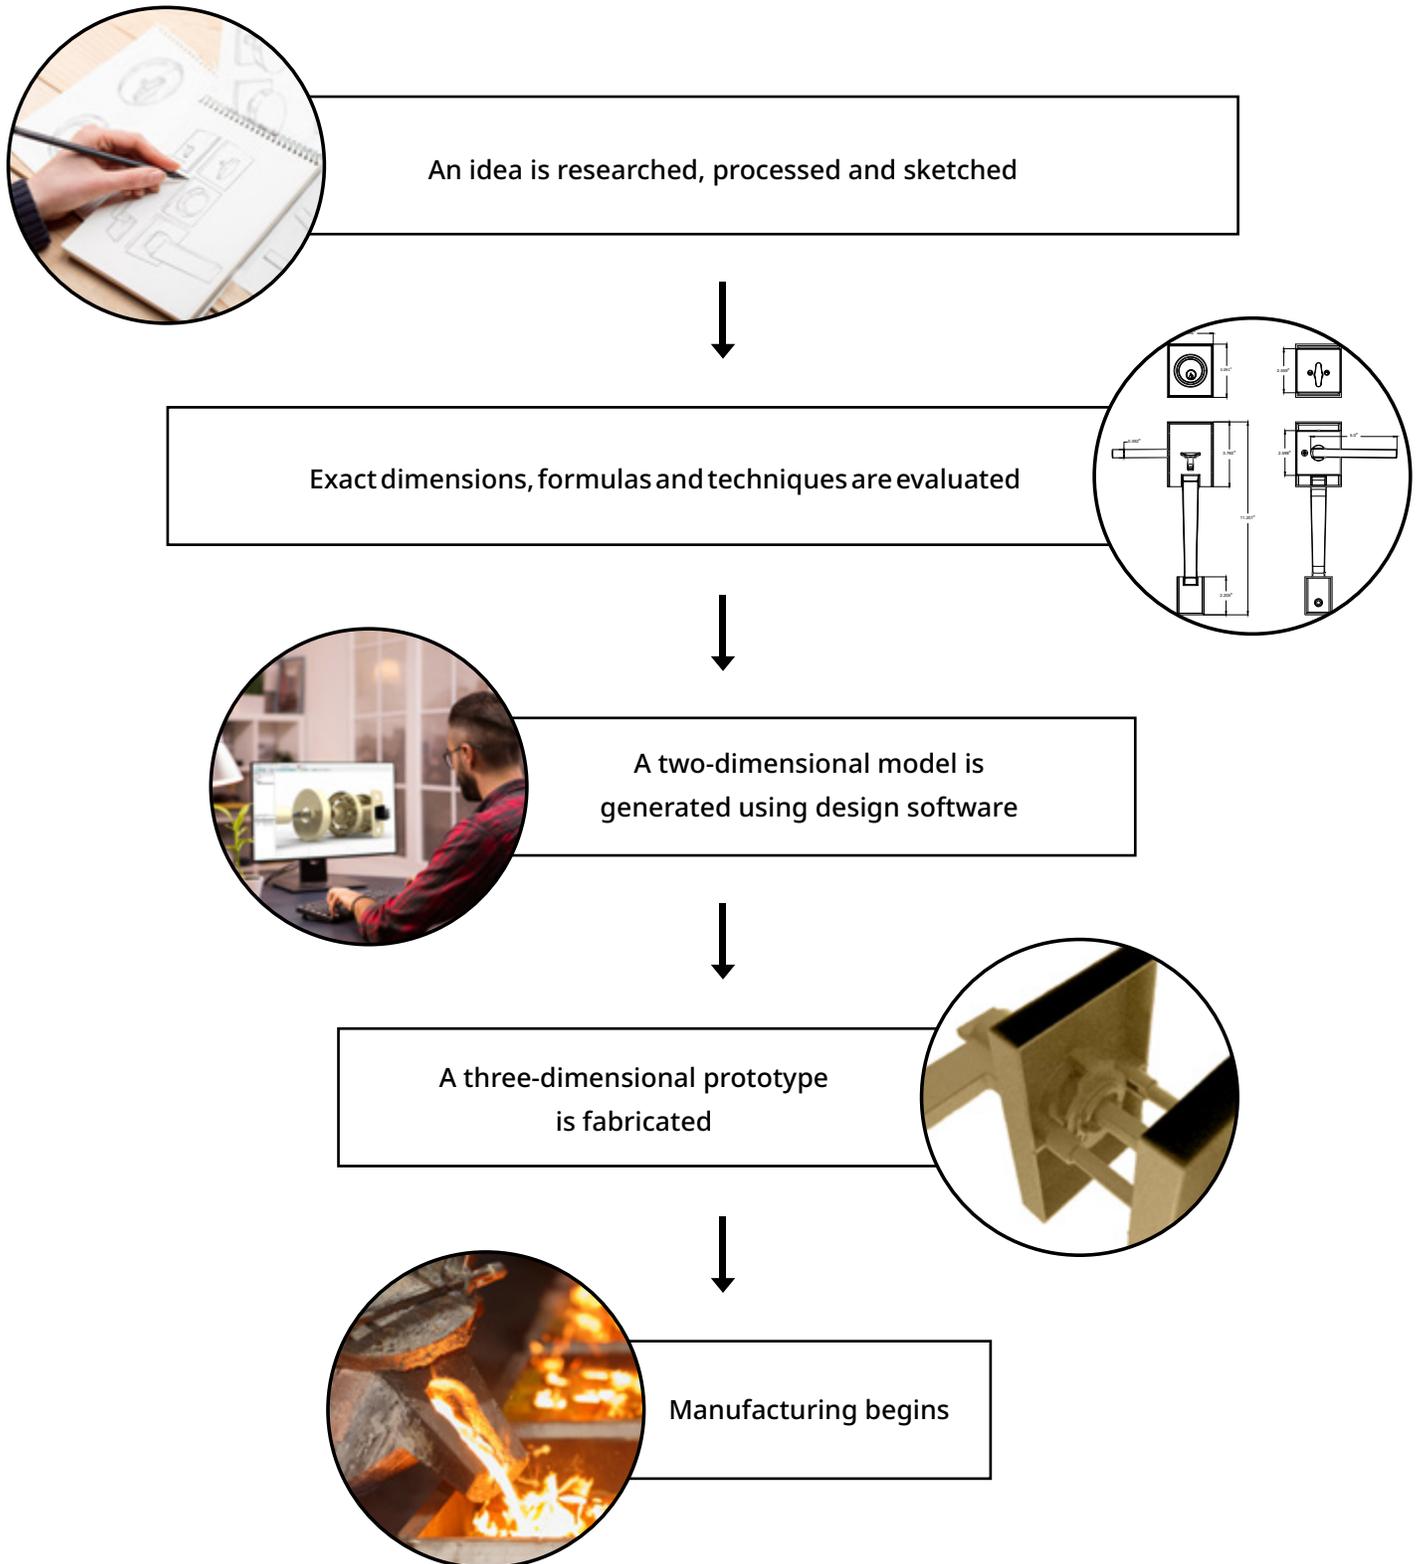

- Smooth edges
- An easily grasped shape that can turn effortlessly
- A textured finish or non-slip coating for easy latching
- A long shaft that can comfortably fit a hand behind the knob

Our production team strives to construct well-built and long-lasting pieces to be available for our valued customers.

About

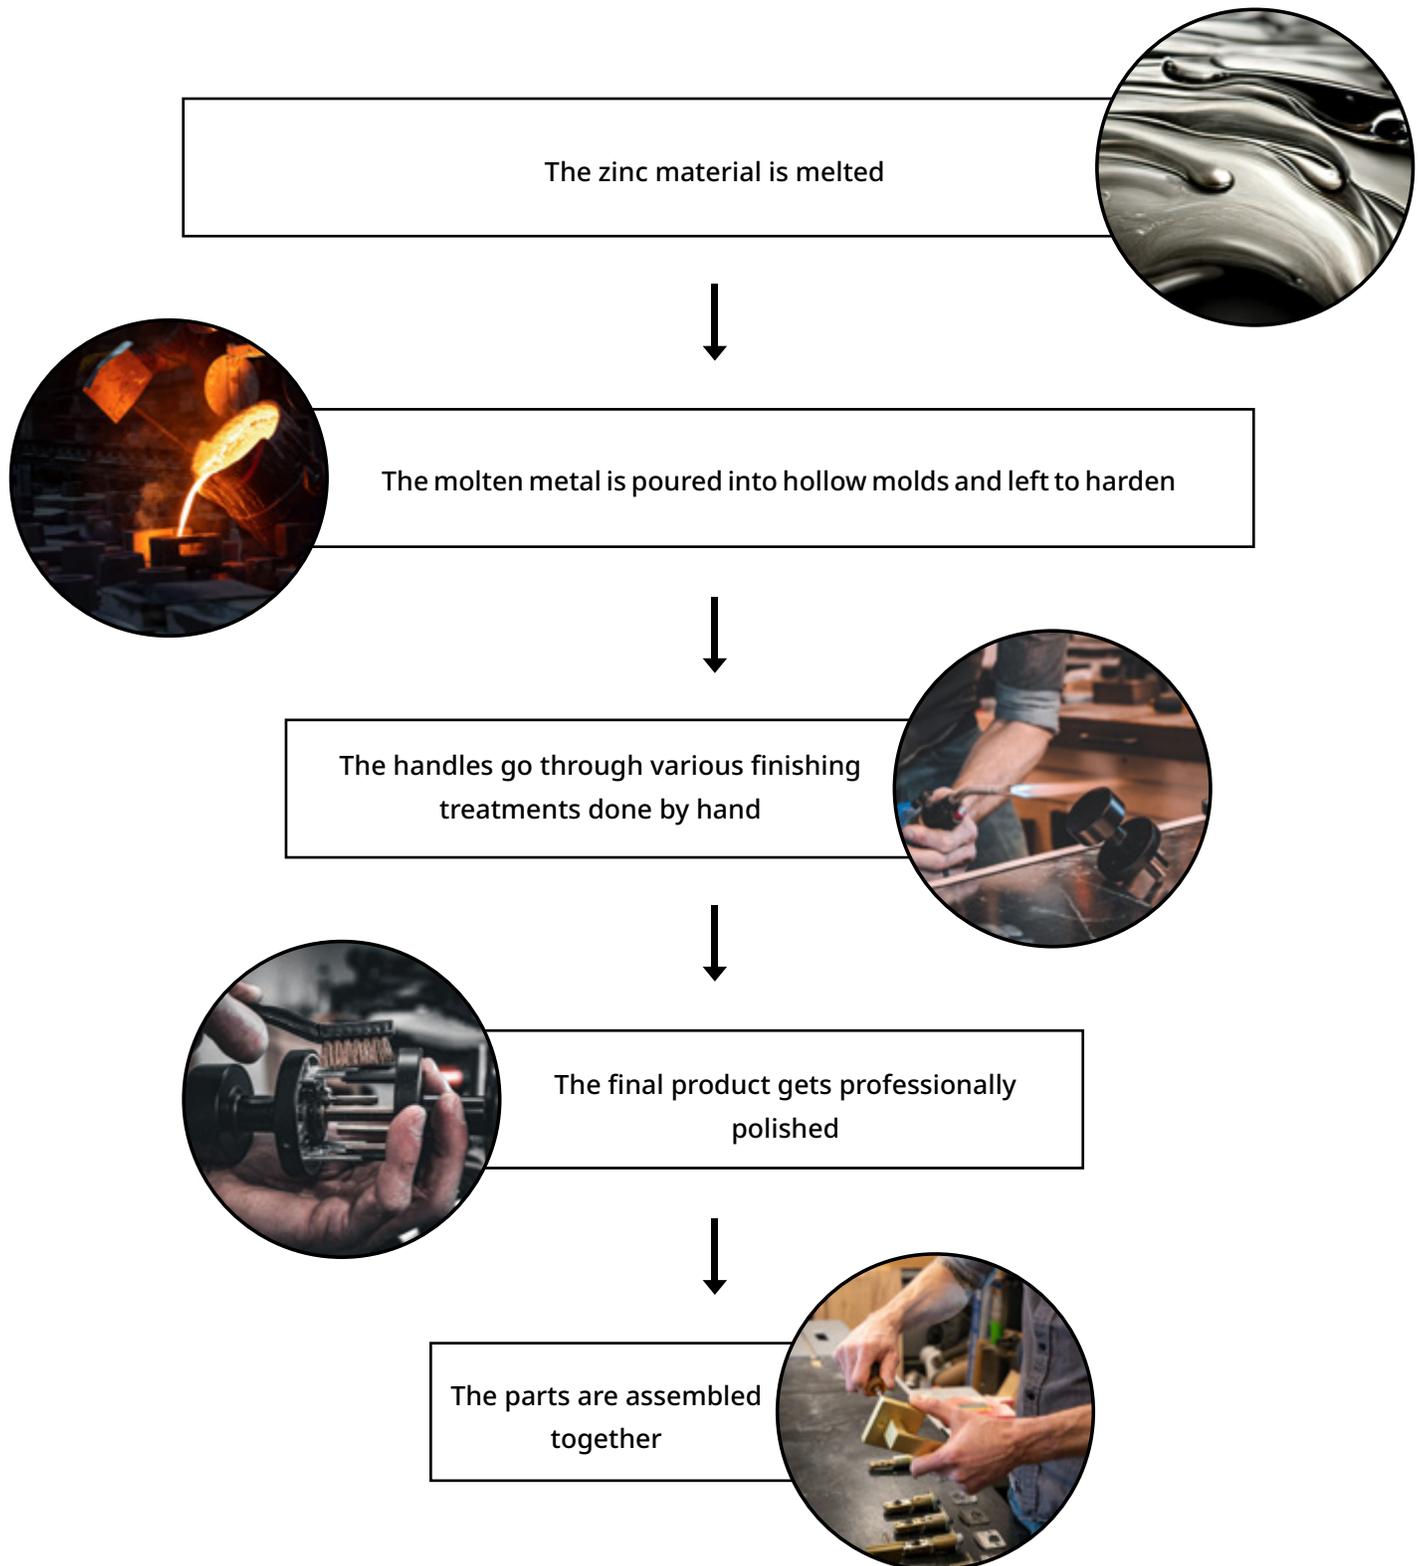

Effective Craftsmanship

Creating new designs involves a fascinating process.

About

At this point, the custom handles are put into the hands of expert craftsmen, who begin the casting process, which is handcrafted skillfully.

About

A group of professionals check to ensure that all parts of the handle work perfectly.

A thorough inspection checks the durability and strength of the product, enabling its use in many different conditions including:

- Heat
- Cold
- Rain
- General wear and tear

Each piece is inspected to confirm that it does not have any blemishes or rough edges. Throughout the entire process, professionals keep checking to ensure that everything is running smoothly **so that our customers are presented with premium quality and aesthetic hardware.**

About

Constantly Brainstorming

When one door closes, the next one opens.

- Just after finalizing a custom design, the team continues on with planning fresh, new ideas.
- As soon as a new product is tested, work is in progress on improving current projects.
- Immediately after launching new ideas, research begins on the next one.

By knocking on the door to opportunity, many beautiful concepts, ideas and improvements are discovered.

Mega Handles is constantly on the lookout to ensure that our customers are perfectly satisfied. To do so effectively, we stand behind our products to ensure 100% satisfaction by presenting lifetime workmanship warranty on each of our products.

In collaborating with many hardware businesses, door companies, contractors, developers, and interior designers, we strive to provide them with premium quality handles at affordable rates.

About

Final Result

Customers benefit greatly from using Mega Handles hardware for their projects.

Every single Mega Handles product is

- Well-built
- Strong mechanical durability
- Zinc-casted hardware
- Constructed to last

Mega Handles is a trusted source for high quality hardware.

The lifetime workmanship warranty has got you covered on any issues that may arise. Customer service representatives are committed to providing you with the support and help you need.

If you're looking for an easy and efficient way to start your project, Mega Handles provides a stress-free solution without the usual hassles involving hardware.

About

The prices are comparable to the cheaper lines, while the products are extremely high-quality, comparable to more expensive companies.

We offer constant customer service, and there's guaranteed to be someone you can talk to if you need assistance answering any questions.

With great customer service, simple installation and quality hardware at cheaper price points, Mega Handles is the stress-free way to get your project done right.

**DISTINCT
AND
ATTRACTIVE**

Collections/Door Levers/Schein

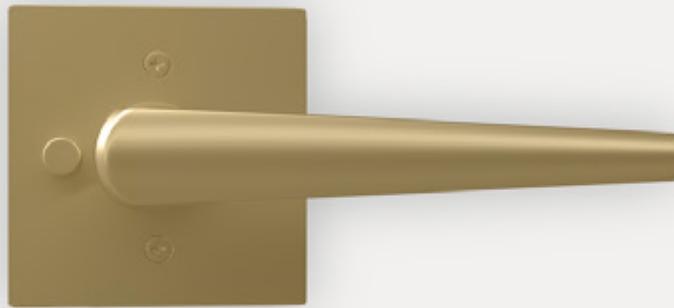

The SCHEIN collection was influenced by a desire to construct a more dynamic and energetic structure. The lever is shaped like an isosceles triangle, with the narrow head pointing inwards, which initiates a welcoming invitation and an amiable spirit. The unique lever shape achieves a contemporary and simplistic style, yet is still different enough to give an individual appearance that is distinctive and attractive. The shaft has an exquisitely crafted moon shaped cut which adds elegance and flawlessly balances the various elements.

Collections/Door Levers/Prime

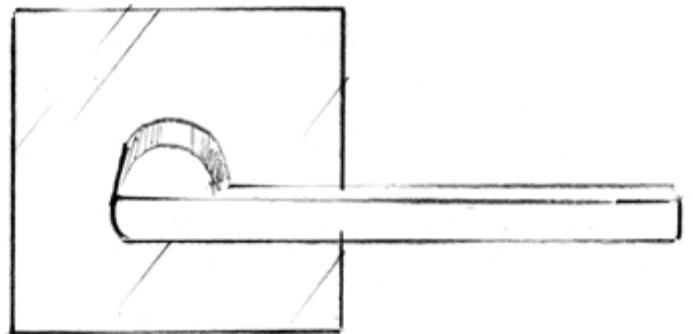

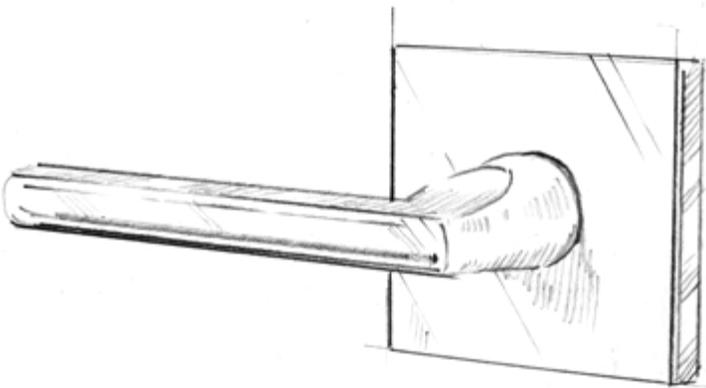

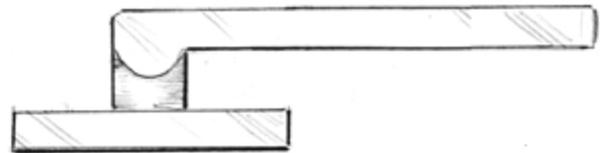

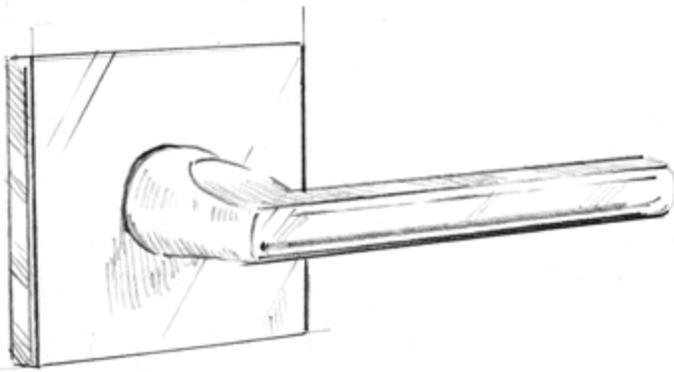

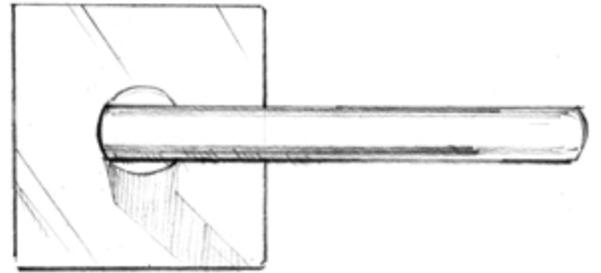

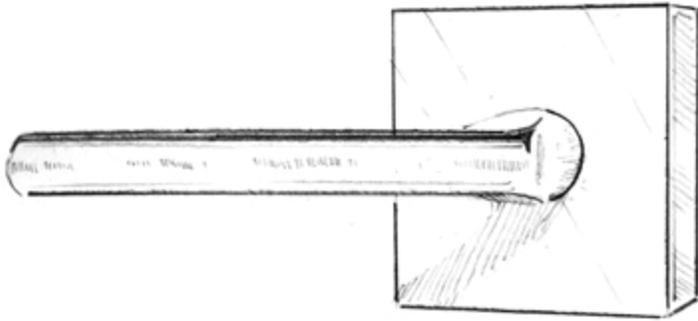

**BOLD
AND SHARP**

Collections/Door Levers/Prime

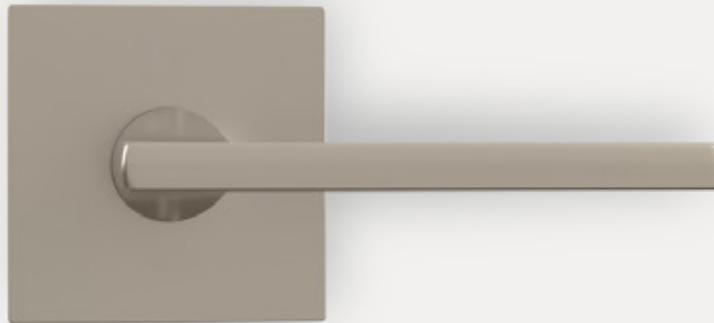

||| The PRIME collection introduces an innovative design that is pure, sharp and distinct. There is nothing excessive about the composition; which contains a sleek linear cut and a slightly curved edge. The geometric style of a straight horizontal lever with a square right-angled rosette makes it a minimalistic, yet timeless work of art. The smooth shape presents a smart approach to its complex elements, combining the rosette and lever into a seamless composition.

**DELUXE
AND
SOPHISTICATED**

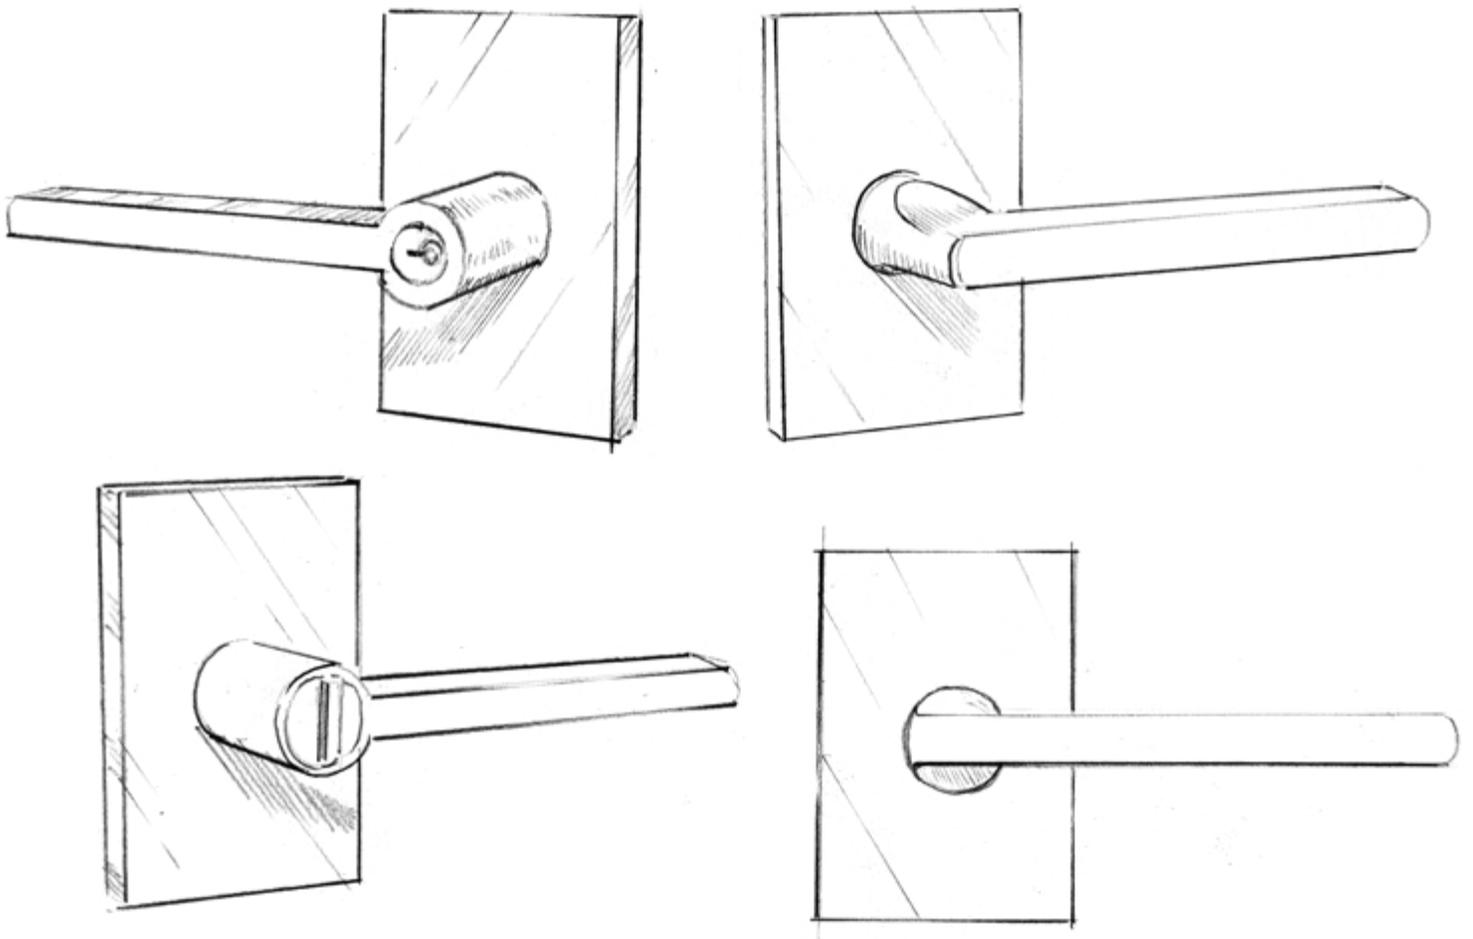

Collections/Door Levers/Glamor

The GLAMOR collection is as sterling and understated, as it is luxurious and magnificent. The rectangular rosette will impart volume to your door, disclosing a modern and exquisite undertone. The heart of the design lies in the rosette, offering added elegance to the doorway. Its narrow, straight lever adds modernity and nobility to the handle in a simple yet cutting edge approach. The symmetrical and balanced impression was generated by constructing two contrasting shapes and assembling them together.

**CURRENT
AND
GRACEFUL**

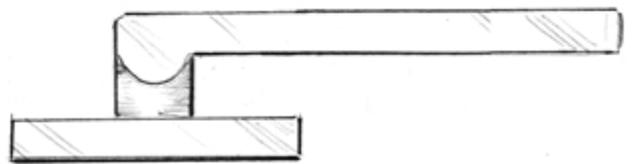

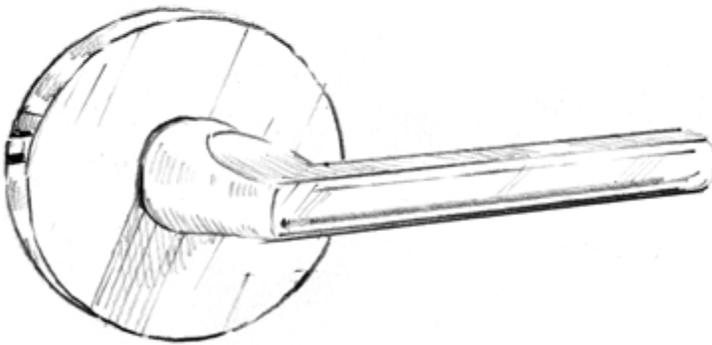

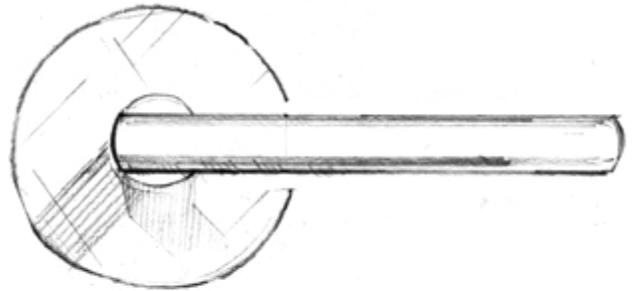

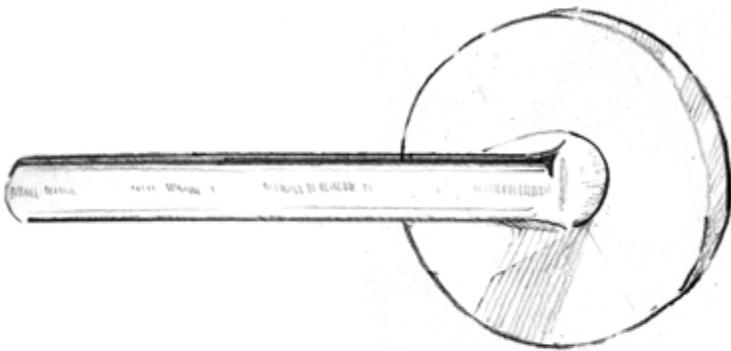

Collections/Door Levers/Ralph

The RALPH collection consists of a fresh, cutting-edge, and distinctive design. The composition, which has a smooth linear cut and a slightly curved edge, is restrained and not overdone. It is a geometrically simple yet classic piece of art, with a straight horizontal lever and a round rosette. The rounded form employs a clever strategy to combine the lever and rosette into a single continuous composition. The straight lever in combination with the round rosette will certainly give your room a contemporary vibe.

**CIRCULAR
AND CHIC**

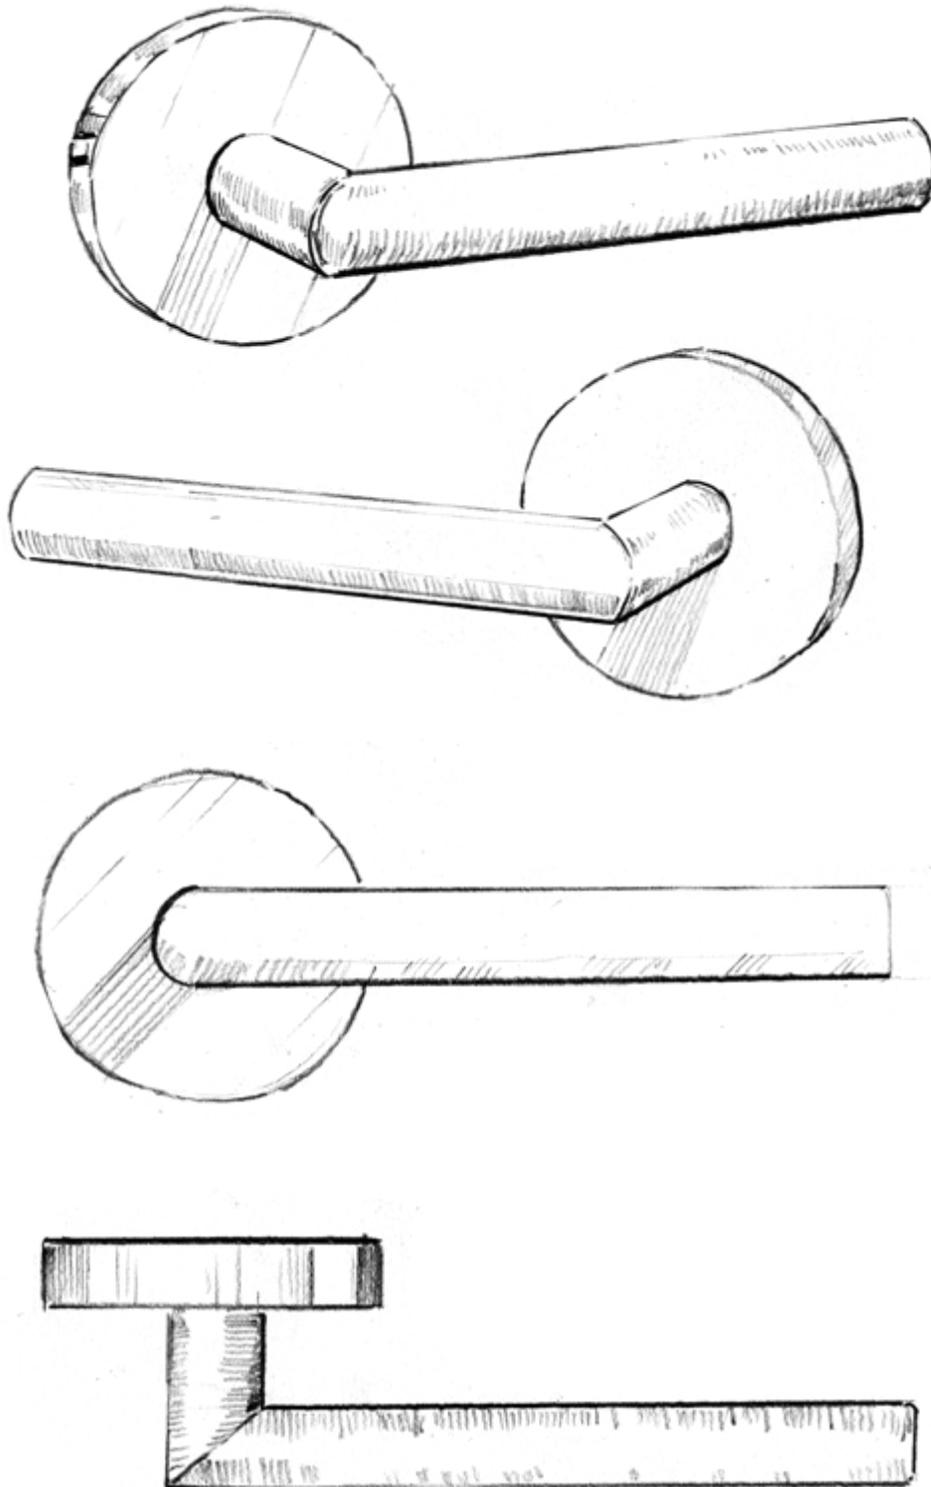

Collections/Door Levers/Ronn

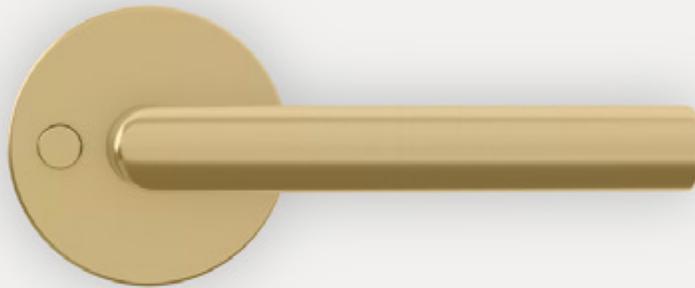

The RONN collection is an illustration of calmness and peace. It consists of a cylindrical lever and a round rosette. Its general roundness evokes feelings safety and protection. When used, circular forms will give your room a pleasant ambiance because they are gentle, mild, and inviting in nature. The subtle, modest appearance is emphasized by combining the round effects of the rosette and the lever, which subtly changes the atmosphere of the space by adding a calming whisper.

**SUBTLE
AND
TASTEFUL**

Collections/Door Knobs/Buena

The BUENA collection portrays peacefulness and gives over a soothing impression. It is comprised of a round rosette and a circular knob. Its general roundness creates an aura of confidence and dependence. Spherical shapes are subtle, light and warm in characteristic, granting a delightful aura to the room it's intended for. By integrating spherical qualities to both the rosette and the knob, the peaceful attributes are intensified, thereby increasing the tranquil feeling that these shapes bring about.

Collections/Door Knobs/Laura

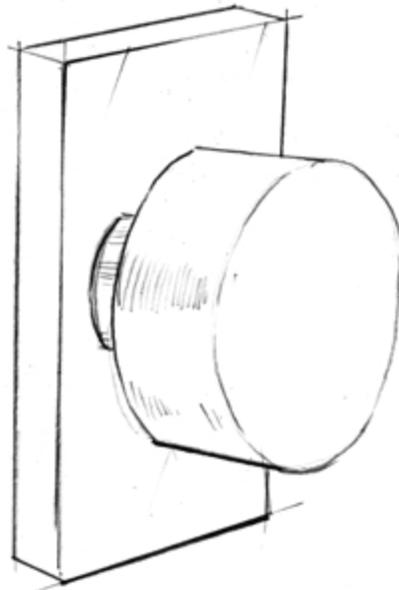

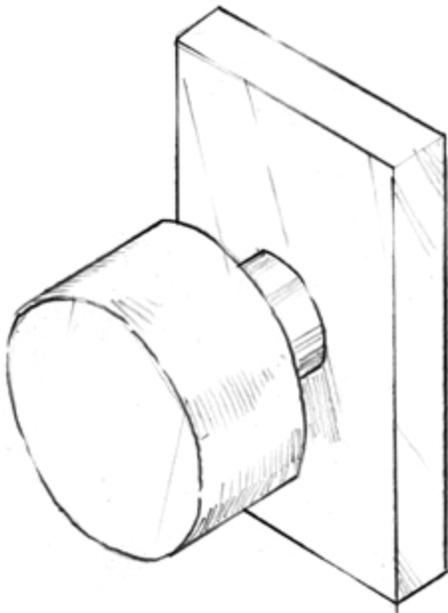

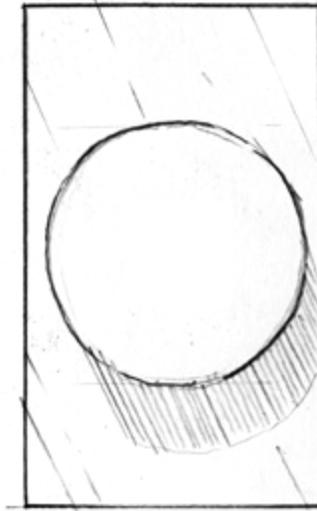

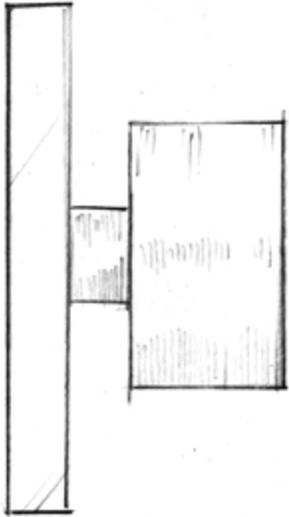

**LUXURIOUS
AND
ELEGANT**

Collections/Door Knobs/Laura

The LAURA collection is sterling and understated, as well as luxurious and magnificent. Your door will gain volume from the rectangular rosette, which reveals a sophisticated and contemporary undertone. The heart of the design lies in the rosette, offering added elegance to the doorway. Its simple, round knob adds modernity and nobility to the handle in a simple yet cutting edge approach. The symmetrical and balanced impression was generated by constructing two contrasting shapes and assembling them together.

Installation Guides

Installation Guide - Tobelle

STEP 1

The deadbolt latch will be installed first. Check the two latches to make sure you are using the correct one.

STEP 2

The deadbolt latch is set to 2-3/8 (60mm). If it needs to be adjusted to 2-3/4 (70 mm) follow the next step.

STEP 3

Adjusting the deadbolt latch:

Rotate the latchplate in a clockwise position.

Pull the latch out as far as it can go.

Rotate it in a clockwise position to click it into place.

STEP 4

Install the deadbolt latch onto the door. If the hole is not centered, adjust the latch size as instructed in Step 2.

STEP 5

Make sure the extended rod is in a downwards position. Connect the exterior deadbolt with the interior deadbolt through the latch.

Correct

Incorrect

STEP 6

Secure the deadbolt with screws.

STEP 7

Test to ensure that the lock works properly.

STEP 8

Test to ensure that the keys work properly.

STEP 9

Install the door latch onto the door and ensure that the hole is centered. Use the shorter screws.

If hole is not centered

Adjust latch size by moving the size setting.

STEP 10

Connect the long entrance handle with the lever through the latch.

STEP 11

Secure the left screw first.

STEP 14

Test the long entrance handle to ensure that it works correctly.

STEP 12

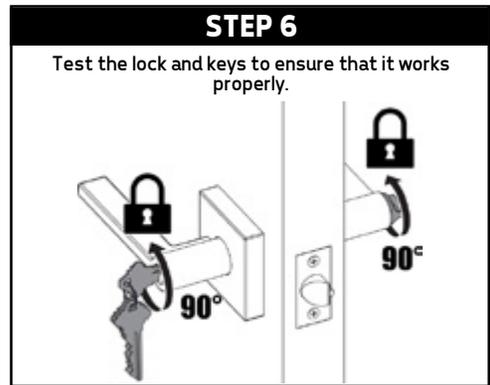

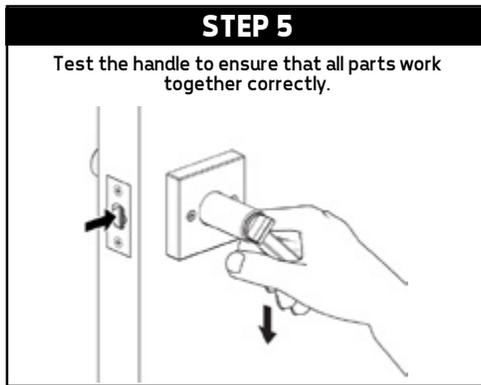

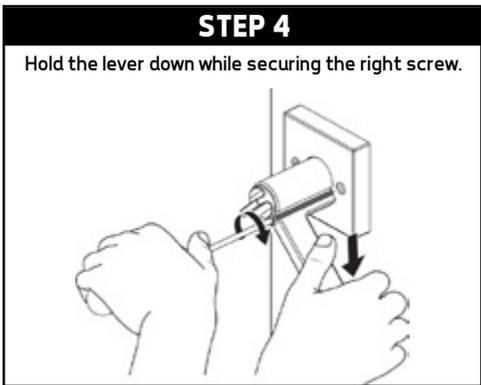

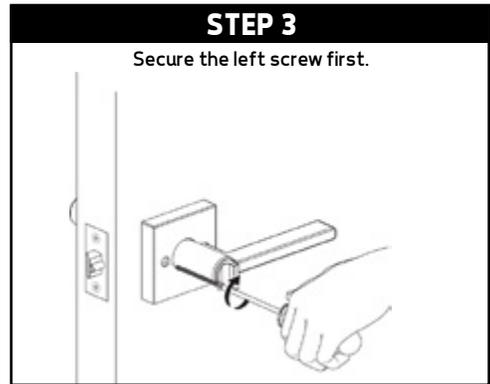

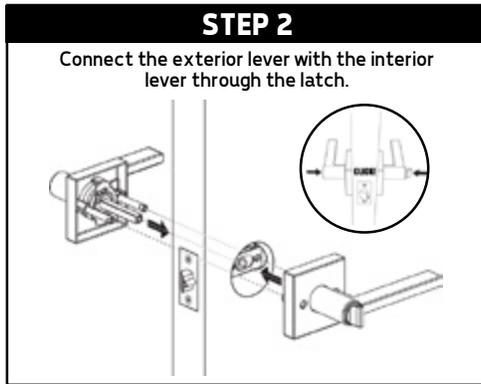

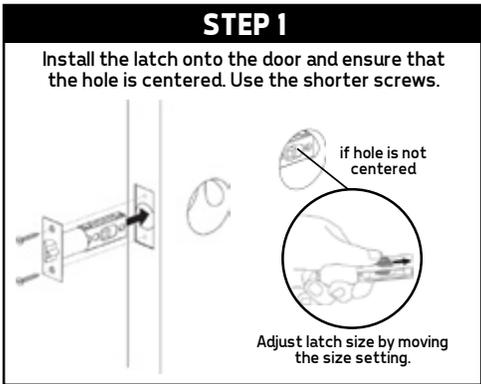

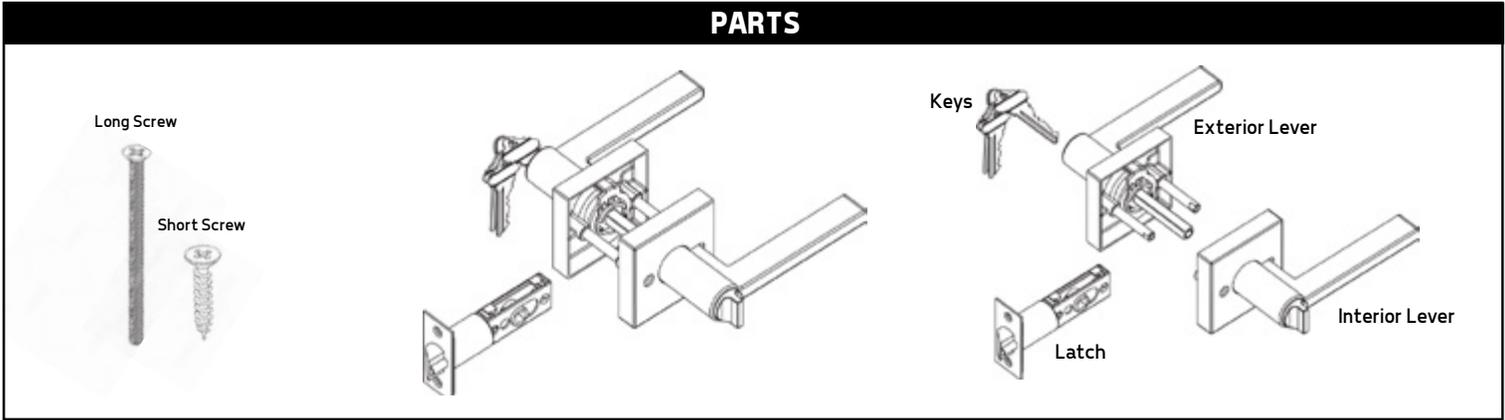

Hold the lever down while securing the right screw.

STEP 13

Screw in the nut on the backside of the long handle to secure it to the door.
