

IMPORTANT!: Lever/Knob location on the sideplate (Top, middle, bottom) varies depending on style. Determine proper orientation BEFORE drilling holes.

1. Determine Lever/Knob location & plate orientation

2. Door Prep

3. Install latch

For Privacy function: Threaded hole for the privacy pin must face the interior side of the door.

4. Install Inside Trim Plate

Prior to drilling holes, align side plate using Edge Guide (provided).

Plates and Lever/Knob vary depending on style

5. Install Outside Trim Plate

6. Tighten Lever/Knob

After lock has been installed tighten set screw with Allen Wrench.

Dummy plate

2 Install Mounting Plate & Adjust for level

3 Install Sideplate

Privacy Function

Inside

Outside

Make sure the release hole lines up with the privacy pin.

For emergency, insert Emergency Release tool into the release hole of the exterior rosette to open the lock.

Optional Thru Bolts

Thru bolts (provided) may be used on hollow doors instead of wood screws (also provided).
